Education

Anuradha Engineering College

Nov 2022 – Jul 2025

B.E in Information Technology

CGPA : 7.8

Yashwantrao Chavan Institute of Polytechnic

Jul 2020 – Jul 2022

Diploma in Computer Technology

Percentage : 75%

Experience

Jarurat Care Foundation

Nov 2025 – Mar 2026

Full Stack Developer Intern

Remote (Mumbai, Maharashtra)

- Developed a full-stack **Nurse Management System** using **MERN + Firebase**, managing **100+ staff records** with real-time updates and improved data accessibility.
- Optimized a **WhatsApp bot** using **Java & Spring Boot**, reducing manual response effort by **40%** and improving workflow efficiency.
- Collaborated with a team of **4+ developers** to deliver **scalable, production-ready applications**, ensuring high code quality, **timely delivery**, and efficient team coordination..
- Revitalized and maintained the organization's website, improving **UI/UX** and reducing **page load time by 30%**, leading to higher user engagement.
- Integrated **REST APIs** and **real-time features**, enhancing system responsiveness and ensuring seamless data flow across applications.

Projects

AgenticAI Studio / React, TypeScript, Node.js, Express, MongoDB, Deno, LLM APIs

[Demo](#), [Code](#)

- Architected a **multi-agent AI coding platform** (Planner, Coder, Debugger) that automates end-to-end code generation, execution, and debugging, reducing manual development effort and accelerating project creation workflows.
- Enabled **real-time streaming (SSE)** with **<2 seconds latency**, delivering instant code generation, live preview, and seamless user interaction within a browser-based IDE environment.
- Integrated advanced capabilities** including agent memory, version control, and hybrid execution engine, improving developer productivity, system reliability, and overall platform efficiency.

FutureCart E-Commerce Website / React, TypeScript, Supabase

[Demo](#), [Code](#)

- Built a scalable full-stack eCommerce platform supporting **50+ products** with filtering, cart, wishlist, and secure checkout, ensuring a smooth and optimized shopping experience.
- Established a real-time product management system using Supabase Realtime, reducing admin update delays by **60%** and enabling instant UI updates.
- Designed a scalable role-based architecture (Admin, Seller, User) with chatbot integration, increasing user engagement and operational efficiency.

Connectly / React, TypeScript, Supabase, WebRTC

[Demo](#), [Code](#)

- Developed a scalable social media platform supporting posts, reels, stories, and real-time interactions for **multiple concurrent users** with optimized performance and responsive UI.
- Delivered a real-time messaging, notifications, and presence system using Supabase Realtime, ensuring **low-latency (<1s) communication** and seamless user connectivity across sessions.
- Incorporated peer-to-peer **voice and video calling** using WebRTC with secure backend (Postgres, RLS), improving communication reliability and data security.

Technical Skills

Languages: JavaScript, Java, C, HTML/CSS, TypeScript

Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, Spring Boot, Tailwind CSS, MongoDB, Supabase, Firebase

Tools & Concepts: Git, GitHub, Docker, VS Code, IntelliJ IDEA, npm, Maven, TanStack Query, Zustand, REST APIs, WebRTC, Real-time Systems

Certifications

- Web Development (Internshala)
