Education

Anuradha Engineering College

B.E in Information Technology

Nov 2022 – July 2025

CGPA : 7.8

Yashwantrao Chavan Institute of Polytechnic

Diploma in Computer Technology

July 2020 – July 2022

Percentage : 75%

Experience

Jarurat Care Foundation

Full Stack Developer Intern

Nov 2025 – Mar 2026

Remote (Mumbai, Maharashtra)

- Built a **full-stack Nurse Management System** using MERN stack (React, Node.js, Express, MongoDB) and Firebase, enabling efficient staff management, data handling, and real-time updates.
- Developed and enhanced a **WhatsApp bot system** using Java and Spring Boot, implementing new features, optimizing workflows, and improving automated user interactions.
- Designed and contributed to **multiple solo and team-based projects**, collaborating with developers to deliver scalable and production-ready solutions.
- Developed and maintained the **organization's main website**, improving UI/UX, performance, and overall user engagement.
- Gained hands-on experience in **full-stack development, API integration, and real-world problem solving**, delivering high-quality features in a collaborative environment.

Projects

AgenticAI Studio | React, TypeScript, Supabase, Deno, LLM APIs

[Demo](#), [Code](#)

- Built a full-stack AI-powered coding platform with a multi-agent architecture (Planner, Coder, Debugger) to automate code generation, execution, and debugging from user prompts.
- Designed a scalable backend using Supabase Edge Functions and LLM APIs, enabling real-time streaming (SSE) and efficient agent orchestration.
- Developed advanced features including agent memory, version control, and hybrid code execution engine, delivering an interactive browser-based IDE experience.

FutureCart E-Commerce Website | React, TypeScript, Supabase

[Demo](#), [Code](#)

- Built a full-stack eCommerce platform with product browsing, advanced filtering, cart, wishlist, and secure checkout functionality.
- Designed a real-time product management system using Supabase Realtime, enabling instant UI updates for product approvals, updates, and deletions.
- Developed a scalable role-based architecture (Admin, Seller, User) with chatbot integration, improving user engagement and marketplace functionality.

Connectly | React, TypeScript, Supabase, WebRTC

[Demo](#), [Code](#)

- Built a full-stack social media platform supporting posts, reels, stories, and user interactions with a responsive and modern UI.
- Designed real-time messaging, notifications, and presence system using Supabase Realtime, ensuring seamless communication across users.
- Developed peer-to-peer voice and video calling using WebRTC, along with secure backend architecture using Postgres, RLS, and database triggers for data consistency.

Technical Skills

Languages: JavaScript, Java, C, HTML/CSS, TypeScript

Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, Spring Boot, Tailwind CSS, MongoDB, Supabase, Firebase

Tools & Concepts: Git, GitHub, Docker, VS Code, IntelliJ IDEA, npm, Maven, TanStack Query, Zustand, REST APIs, WebRTC, Real-time Systems

Certifications

- Web Development (Internshala)
